Metal Mod Manager

BRAND GUIDE · V1

November 2026 · logo files in this folder are the masters

THE MARK: CAST INGOTS

Three cast ingots, stepped like a load order. The newest one sits on top in indigo.

Drawn on a 32 grid: each ingot is 7 units tall (a 2-unit lit top face over a 5-unit front), with 3-unit gaps and a 5-unit step. All shapes are flat fills, so the mark converts cleanly to one colour.

VERSIONS

Full colour · dark ground (primary)

Full colour · light ground

One colour white

One colour dark

App icon

CLEAR SPACE

Keep clear space of **x** on every side, where **x** is the height of one ingot (about a quarter of the mark's height).

Applies to the mark, both lockups and the wordmark. Nothing else (text, edges, other logos) enters it.

MINIMUM SIZES

Mark 16 px · Icon 16 px · Horizontal 140 px wide · Stacked 72 px wide

At 24 px and below, use the pixel-fitted drawings (**logo-mark-small-*.svg**, **app-icon-small.svg**, **app-icon-small-24.svg**), not the master scaled down.

COLOUR · DARK (DEFAULT THEME)

	Name	Use · Moon mapping	on #0F1114	on #17191D	on #1F242B
	Forge Indigo #4F6BFF	Primary brand colour. Front of the top ingot. New: a lighter step of Moon MysticIndigo9 #294BFF, so the mark holds 3:1 on every dark background (#294BFF itself is 3.2:1 on #0F1114).	4.4:1 pass	4.1:1 pass	3.6:1 pass
	Ingot Highlight #8FB3FF	Lit top face of the indigo ingot. = Moon MysticIndigo11 (dark)	9.1:1 pass	8.4:1 pass	7.5:1 pass
	Steel #8E9DB3	Front of the steel ingots. Between Moon Gray9 #798AA3 and Gray11 #A6B7CF	6.9:1 pass	6.4:1 pass	5.7:1 pass
	Steel Light #D6DFEA	Lit top faces of the steel ingots. Between Moon Gray11 and Gray12 #E4ECF8	14.0:1 pass	13.1:1 pass	11.6:1 pass

Contrast checked against WCAG 2.1 non-text contrast (3:1) for graphics. The app UI keeps Moon's ramp unchanged: buttons stay MysticIndigo9 **#294BFF**; the brand colours only appear in the logo.

COLOUR · LIGHT GROUNDS

	Name	Moon	on #FFF
	Moon Indigo #294BFF	= MysticIndigo9	5.9:1
	Indigo Light #7CA3FF	= MysticIndigo8 (light). Top facet only; the ingot outline is carried by #294BFF	2.5:1
	Steel Ink #1C232F	= Gray12 (light)	15.8:1
	Steel Mid #57677E	= Gray11 (light)	5.8:1

Wordmark text: **#E4ECF8** on **#0F1114** 15.9:1 · **#E4ECF8** on **#1F242B** 13.1:1 · **#1C232F** on **#FFFFFF** 15.8:1 (all pass AA 4.5:1).

TYPOGRAPHY

Metal Mod Manager

DM Sans (SIL Open Font License), the same family as the app UI.

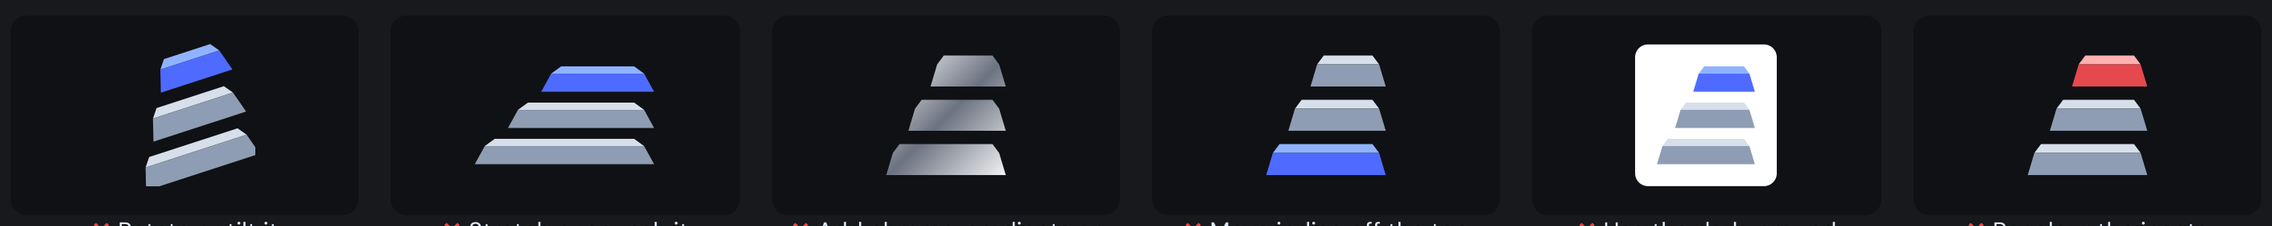

Wordmark: "Metal" Bold 700, "Mod Manager" Medium 500, tracking -1.5%, converted to outlines in the logo files. Short form "Metal" is Bold 700. Headings in brand material: DM Sans 700; body: 400/500. Never set the name in another typeface, in all caps, or with "Metal" in a different colour from the rest on a single line.

CORRECT USE

- ✓ Full colour on Moon's dark backgrounds is the primary use.
- ✓ On white or light grey, use the **-color-light** files or one-colour dark.
- ✓ On photos, screenshots or busy colour, use one-colour white.
- ✓ Write the name as **Metal Mod Manager**; "Metal" alone is fine once the full name has appeared.

Not affiliated with Nexus Mods. Do not pair the mark with Nexus Mods branding in a way that suggests endorsement.

INCORRECT USE

✗ Rotate or tilt it · ✗ Stretch or squash it · ✗ Add chrome, gradients or glow · ✗ Move indigo off the top ingot · ✗ Use the dark-ground colours on white · ✗ Recolour the ingots
